

# **AI-Driven Sustainable Infrastructure: Smart Campus Automation, Energy Optimization, Security, and Intelligent Material Systems**

<b>Chapter</b>	<b>Title</b>	<b>Page No.</b>
1	<b>Foundations of AI, Machine Learning, and Data Science for Intelligent Systems</b>	15
2	<b>IoT Networks and Intelligent Device Integration for Smart Campus Environments</b>	42
3	<b>AI-Driven Energy Optimization and Automated Power Management in Eco-Friendly Institutions</b>	70
4	<b>Advanced Cloud Security and Access Control Models for Protecting Digital Ecosystems</b>	98
5	<b>Cybercrime Threat Detection and Risk Analysis in IoT-Enabled Smart Environments</b>	128
6	<b>AI-Based Cybersecurity and Predictive Intrusion Detection for Modern Digital Systems</b>	156
7	<b>Smart Locker Systems with IoT and Biometrics for Secure Access in Campus Facilities</b>	185
8	<b>Biometric Identification, Authentication, and Identity Management Technologies</b>	213
9	<b>AI-Assisted Material Strength Evaluation and Structural Health Monitoring of Buildings</b>	237
10	<b>Machine Learning-Based Concrete Quality Prediction for Safe and Durable Infrastructure</b>	267
11	<b>Solar Power Integration, Smart Grids, and Renewable Energy Management Solutions</b>	295
12	<b>AI-Based Solar Energy Forecasting, Load Balancing, and Power Optimization Models</b>	325
13	<b>EV Vehicle Management: Smart Charging, Routing, and Energy Optimization in Campuses</b>	352
14	<b>IoT and AI-Based Pollution Monitoring and Environmental Safety Systems</b>	380
15	<b>Eco-Campus Design: Waste Recycling, Water Conservation, Green Mobility, and Sustainability</b>	408

16	<b>Unified AI–IoT–Cloud–Energy Framework for Smart, Secure, and Sustainable Environments</b>	431
