

# Preface

In recent years, the integration of Artificial Intelligence (AI) in higher education has revolutionized the way institutions approach student learning, success, and well-being. "Artificial Intelligence–Driven Intelligent Learning Systems for Language Proficiency, Student Success, and Well-Being in Higher Education" aims to explore the transformative potential of AI-powered systems that are reshaping the educational landscape. This book delves into innovative AI applications, from enhancing language proficiency to fostering personalized learning experiences and supporting mental health initiatives. By combining cutting-edge technologies with educational strategies, this work provides valuable insights into creating a more inclusive, effective, and supportive academic environment for students worldwide.
