

Advanced Engineering Applications of Machine Learning, Deep Learning, and IoT

Chapter	Title	Page No.
1	Machine Learning-Driven Adaptive Communication Systems and Beyond-6G Network Intelligence	15
2	IoT-Enabled Smart Grid Optimization and Intelligent Energy Management Systems	42
3	Machine Learning-Based Digital Manufacturing and Predictive Asset Management for Industry 5.0	67
4	Machine Learning-Enhanced Process Optimization and Sustainable Chemical Production Systems	94
5	Machine Learning-Based Fault Detection and Prognostics in Industrial Systems	123
6	Deep Learning-Based Computer Vision Systems for Industrial Inspection and Quality Assurance	150
7	Deep Learning-Driven Materials Informatics and Computational Modeling for Advanced Physical Systems	179
8	Advanced Optimization Algorithms and Mathematical Intelligence for Machine Learning-Based Engineering Systems	205
9	Machine Learning-Driven Structural Health Monitoring and Predictive Maintenance for Smart Infrastructure Systems	233
10	IoT-Based Environmental Monitoring and Pollution Control Systems for Sustainable Ecosystems	264
11	IoT-Enabled Smart Water Resource Management and Distribution Systems	293
12	IoT-Based Smart Agriculture Systems for Precision Farming and Crop Monitoring	320
13	IoT-Enabled Intelligent Transportation Systems for Real-Time Traffic Monitoring and Optimization	348

14	Machine Learning Framework for Renewable Energy Forecasting and Smart Power Distribution Systems	377
15	Deep Learning-Driven Biomedical Signal Processing and Intelligent Healthcare Diagnostics	402
16	Machine Learning-Based Cybersecurity and Threat Detection Systems for Smart Engineering Networks	425
17	Deep Learning-Driven Speech and Natural Language Processing Systems for Intelligent Applications	450
18	Machine Learning Framework for Financial Forecasting and Intelligent Decision Support Systems	473
19	Deep Learning-Based Autonomous Systems and Intelligent Robotics for Engineering Applications	499
