Intelligent Fraud Detection Systems Using AI, Machine Learning, and IoT: A Behavioral and Psychological Analytics Approach

Chapter	Title	Page No.
1	Introduction to Artificial Intelligence, Machine Learning, and IoT in Intelligent System Development	14
2	Fundamental Concepts and Evolution of Fraud Detection Systems in Digital Environments	47
3	Data Science Foundations for AI-Driven Fraud Detection and Behavioral Analytics	82
4	Ethical, Privacy, and Security Challenges in AI-Based Behavioral and Fraud Detection Systems	120
5	Supervised and Unsupervised Machine Learning Techniques for Fraud Detection Applications	156
6	Security Vulnerabilities and Risk Management in IoT-Enabled Fraud Detection Systems	193
7	Cloud and IoT Integration for Scalable and Distributed Fraud Detection Applications	230
8	Human Behavior Modeling Using AI and Machine Learning Techniques	266
9	Psychological Profiling and Its Role in Intelligent Fraud Detection Systems	302
10	Anomaly Detection Based on Behavioral Patterns Using AI and Statistical Models	338
11	AI-Driven Fraud Detection in Digital Banking and Financial Transaction Systems	375
12	Machine Learning Approaches for Credit Card Fraud Detection and Risk Assessment	411
13	Intelligent Fraud Detection in E-Commerce Platforms Using Behavioral Analytics	448

14	IoT-Enabled Fraud Detection in Smart Retail and Supply Chain Management Systems	485
15	Fraud Detection in Insurance Claim Processing Using Predictive Analytics and AI Models	526
16	Cybersecurity and Fraud Prevention in Online Payment Gateways Using Machine Learning Techniques	560
17	Real-Time Fraud Detection in Mobile and UPI-Based Payment Systems Using AI	597
18	Healthcare Fraud Detection Using Data Mining and Machine Learning Techniques	634
19	Social Media Fraud and Fake Profile Detection Using AI and Behavioral Analysis	670
20	Fraud Detection in Smart Cities Using IoT, AI, and Big Data Analytics	704
